July 2023 **PRODUCTS AND PRICE LIST**

At this time, there is no fine, light colored sand available by the yard on St Croix. Any products requiring this will have to use another sand; this will cost \$2.00 more per square foot. Please ask about options for the products you need, keeping this in mind.

UPDATE DEC 2023: ***indicates adjusted prices for new sand.

SIZES ARE NOMINAL. PLEASE CHECK EXAMPLES TO DETERMINE SUITABILITY FOR YOUR PROJECT. Due to issues with availability of raw materials, prices subject to change; quantity order may be required.

DO NOT PRESSURE WASH THESE PRODUCTS.

NOTES: Also available: moldings and trim, lintels, thresholds, sills, corbels, window and door pilasters, quoins, and large pots made to order.

All of the preceding colored cement and concrete products can be made in your choice of colors and textures, but there may be an additional charge for custom blended colors.

Payment terms: Orders must be accompanied by a payment of 50%, or an incremental payment as agreed upon in larger orders; full payment is expected before orders leave our yard. Orders that remain unpaid and/or in our yard after 30 days, unless other arrangements are made, will be charged storage fees of 10% of invoice value per month or part thereof; after 120 days these orders will be sold to the highest bidder.

Very large quantity orders may be further discounted depending on the items needed.

Shipping: Standard, hand made crates are \$50.00, and hold varying amounts of each product; call for estimates. These are deliverable by crane truck at market prices.

Please do not pressure wash or acid wash any of our colored concrete products. This may cause irreparable damage that may not immediately be apparent. Cleaning with soap, water and bleach will do the job. Interior tile can be most easily maintained with a Mop N Glow type cleaner; exterior tile, after sealing, can be hosed clean with your garden hose. Direct applications of bleach will remove mildew or stains. **Exterior siloxane sealer should be renewed once a year, or when water on the surface soaks in and obviously darkens the tile.**

The 1/2" thick wall tile may be used to solve elevation problems on a good, reinforced concrete floor slab. This thickness cannot span any cracks, which would 'telegraph' through and also crack the grout. We recommend installation by professional tile setters.

The 2" thick tile can be laid on a dry mix of manufactured sand and cement, either inside a building or as an exterior patio or walkway. See our website for installation suggestions.

These products are available in a smooth satin finish, a fine textured stone finish, or a travertine (like coral stone) texture. All can be colored to match or compliment paint, stone, or counter top materials. Samples made available upon request.

You can see our products in issues of "Architectural Digest," "House and Garden," and "Antiques."
